Nationality: Swedish
Date of birth: 1988-09-04

I am a Postdoctoral Research Fellow at the Institute for Data, Systems, and Society (IDSS) at MIT. My research interests are within analysis and control of large-scale networked systems. My main contributions demonstrate certain fundamental limitations to the performance of distributed control algorithms and describe their implications for the envisioned smart power grid. My Ph.D. is from KTH Royal Institute of Technology, and I have spent time as a visiting researcher at UCSB, the Johns Hopkins University, and Caltech. I have previous experience from consulting.
